

# FUNDAMENTAL MEETS TECHNOLOGY

## WORKSHOP

We present a new series of workshops which aim to gather together top researchers in experimental Fundamental Science and top developers and researchers of innovative technologies. Both parties develop prototypes from different points of view, and in many aspects both parties evolve and expand to complement each other. The objective of this workshop is to create the adequate environment in which, in addition to establish the contact of the communities, triggering talks may yield collaborations and profits of other parties' knowledge and know how.
